CYBERSECURITY ANALYST | CLOUD SECURITY | API SECURITY

SUMMARY OF QUALIFICATIONS

- Cybersecurity and networking professional with hands-on experience in API security testing, vulnerability research, Linux environments, technical troubleshooting, and security-focused documentation.
- Skilled in identifying misconfigurations, exposed endpoints, information disclosure risk, access control concerns, and weaknesses in system design through coursework, labs, bug bounty research, and personal projects.
- Strong technical foundation in networking, operating systems, incidence response concepts, infrastructure security, cloud security, python, Bash, SQL, and endpoint analysis.
- Experienced in high-pressure environments requiring detailed reporting, confidentiality, calm decision making, escalation, and security awareness.
- Associate of Applied Science in Cybersecurity and Networking with a 4.0 GPA; currently pursuing a Bachelor's degree in Cybersecurity with an expected graduation year of 2026.

CORE COMPETENCIES

Cybersecurity: Vulnerability Research, API Security Testing, Threat Identification, Security Documentation, Incident Response Concepts, Risk Assessment, Access Control, Security Awareness

Cloud & Networking: Cloud Security Fundamentals, Shared Responsibility Model, VPC Concepts, Network Segmentation, Firewalls, Security Groups, Network Access Controls, OSI Model, Ports and Protocols

Operating Systems & Tools: Linux, Ubuntu, Pop!_OS, Windows Support, GitHub, OpenAPI, SSH, RDP, VNC, Jira, Zendesk

Programming & Scripting: Python, Bash, SQL, MySQL, PostgreSQL

Technical Troubleshooting: Endpoint Analysis, Log Review, Error Tracking, Hardware Troubleshooting, IoT Troubleshooting, Remote Support, Technical Documentation

Professional Skills: Written Communication, Critical Thinking, Problem-Solving, Attention to Detail, Adaptability, Escalation, Confidentiality, Calm Decision-Making Under Pressure

EDUCATION

DEVRY UNIVERSITY, College of Engineering & Information Science
BACHELORS OF SCIENCE IN CYBERSECURITY AND NETWORKING, GPA: 4.00
EXPECTED 2026

DEVRY UNIVERSITY, College of Engineering & Information Science
Associate of Applied Science in Cybersecurity and Networking, GPA: 4.00
October, 2025

DEVRY UNIVERSITY, College of Engineering & Information Science
Undergraduate Certificate in Cybersecurity, GPA: 4.00
March, 2025

TECHNICAL PROJECTS & SECURITY LABS

API Security & Bug Bounty Research

- Conducted API security research focused on identifying exposed endpoints, information disclosure risks, leaked keys, misconfigurations, and weak access controls.
- Reviewed OpenAPI documentation and endpoint behavior to understand system flow, map attack surfaces, and identify areas where authorization or data handling could fail.
- Documented findings with focus on risk, impact, reproduction steps, and remediation recommendations.

Cloud Security Coursework & Labs

- Studied secure cloud design, shared responsibility, data protection, compliance, application security, incident response, and security operations.
- Applied cloud networking concepts including VPC design, segmentation, security groups, network access controls, baselines, and monitoring.
- Practiced defense-in-depth thinking by connecting identity, network controls, application security, and operational monitoring into one secure system.

AI Career Decision Support Tool — Hackathon Project

- Collaborated on an AI-powered career decision tool designed to help users compare education, job, and career path options based on urgency, cost, flexibility, risk, and credential needs.
- Helped design responsible AI features including human review, limitation statements, harm identification, and bias awareness.
- Built and organized project logic using Python, Streamlit, GitHub, and structured decision factors to generate ranked recommendations, tradeoffs, and action steps.
- Strengthened practical experience in AI system design, user-centered problem solving, technical documentation, and risk-aware decision support.
